Entre Art et Industrie / Between Art and Industry

La collection Bassin incarne une symbiose entre l'artisanat d'art et l'industrie, mêlant l'essence du chêne massif provenant des forêts françaises d'Île-de-France, travaillé à la main en Bretagne, avec l'acier manufacturé en Rhône-Alpes. Entre courbes et angles droits, entre organique et rectiligne, entre douceur et rigueur, entre innovation et structure.

The Bassin collection embodies a symbiosis between fine craftsmanship and industry, blending solid oak sourced from the forests of Île-de-France and hand-worked in Brittany with steel manufactured in the Rhône-Alpes region. It navigates the space between curves and straight lines, between the organic and the geometric, between softness and precision, between innovation and structure.
